## DID YOU KNOW?

In 2016 SIAC worked on alarm ordinances in 30 states and 91 jurisdictions.  
Roughly 40% of SIAC's activities were in California.

**Ordinance activity is <10% of SIAC's overall mission.**

**Most of SIAC's activity is proactive:**

**Attended over 156 meetings in 2016 with law enforcement at the local, state and national level.**

**In 2016 How many hours did you spend:**

Monitoring ordinance activities?

Writing letters to elected officials?

Attending meetings with elected officials?

Contacting local law enforcement to promote up to 90% reductions in alarm reduction?

**SIAC invested over 8,000 hours doing these things for you!**

During 2016 SIAC had direct contact nationally with 146 agencies, of these 60 were with California jurisdictions. The end goal of these contacts was to help develop successful alarm management programs in every agency in California. These contacts represent multiple calls and meetings while most are ongoing relationships well into 2017 and likely beyond. Just as an estimate, the typical alarm ordinance is a process that takes over two years and during this process relationships are formed that go beyond the successful passage of an ordinance.
